	EduGeniusSpace												
1	EGS_BR_001	https://edu.genius.space/uk/profile/main	Male avatar icon is displayed for a female user profile	**Platform**: Web application **Browser**: Safari **Operating** System: macOS **Language**: Ukrainian		1. Log in to the Genius Space platform. 2. Navigate to Profile. 3. Open the Basic Information section. 4. Check the Gender field. 5. Observe the profile avatar icon.	The profile avatar should display an icon corresponding to the selected gender (Female).	A male-looking avatar icon is displayed, although the Gender field is set to Female.	**Minor**– visual/UI issue that does not affect core functionality.	New	**Low** – cosmetic issue that can be addressed in a future update.		UI
2	EGS_BR_002	https://edu.genius.space/uk/profile/main	Save button becomes disabled after editing profile information.	**Platform**: Web application **Browser**: Safari **Operating** System: macOS **Language**: Ukrainian		1. Log in to the Genius Space platform. 2. Navigate to Profile. 3. Open the Basic Information section. 4. Edit any profile field. 5. Observe the Save button. 6. Attempt to click the Save button.	The Save button should remain enabled after editing profile information and allow the user to save the changes.	The Save button becomes grey after editing profile information and does not respond to clicks. The user cannot save the changes.	**Medium** – the user may be unable to save profile changes.	New	**Medium** – the issue affects profile editing functionality.		
3	EGS_BR_003	https://edu.genius.space/uk/courses/profes	Course module thumbnail image is not displayed	**Platform**: Web application **Browser**: Safari **Operating** System: macOS **Language**: Ukrainian		1. Log in to the Genius Space platform. 2. Navigate to Profile. 3. Scroll down to Module 3. 4.Observe the module thumbnail image.	The course module thumbnail image should be displayed correctly	The module thumbnail image is missing. A grey placeholder with a default image icon is displayed instead.	**Low** – visual issue that does not affect the main course functionality.	New	**Low** – the missing image affects the visual presentation of the course page.		
	WordWall												
4	WW_BR_001	https://wordwall.net/	Images are not displayed correctly in search results for Ukrainian queries.	**Platform**: Web application **Browser**: Safari **Operating** System: macOS **Language**: English	1. The user has access to the Wordwall website. 2. The user opens the activity creation or editing page. 3. The user has access to the image search feature. 4. The image search field is available.	1.Open Wordwall. 2.Navigate to the image search feature. 3.Enter a search query in Ukrainian. 4 Click the Search button. 5.Observe the images displayed in the search results. 6.Repeat the search using the English equivalent of the Ukrainian keyword.	Images should be displayed correctly in the search results for both Ukrainian and English search queries.	Some images are not displayed correctly when searching in Ukrainian. Instead, broken image are shown. Images are displayed correctly when using English search queries.	**Medium** – affects the image search experience for Ukrainian	New	**Medium** – may negatively affect usability for Ukrainian-speaking users		
	Miro												
5	Miro_BR_001	https://miro.com	Unable to group freehand drawings with other objects	**Platform**: Miro Web Application **Browser**: Safari **Operating** System: macOS **Language**: Ukrainian	The user has access to the Miro website. The user is logged in to their Miro account. The user has opened the relevant Miro board. The user has access to the feature where the bug occurs.	1. Open a Miro board. 2.Add a text object and an image to the board. 3.Draw something using the Pen tool. 4.Select the text, image and freehand drawing together. 5.Click Group in the toolbar or use Cmd + G.	All selected objects, including the freehand drawing, should be grouped into a single group	All objects can be selected together, but the Group command does not work. The selected objects remain ungrouped.	**Medium**	New	**Medium**		Functional
	Quizlet												
6	Quizlet_001	https://quizlet.com/class/29816932/materials	New flashcards are not added to a class when using the "Start teaching this material" pop-up.	**Platform**: Quizlet Web Application **Browser**: Safari **Operating System**: macOS **Language**: English	1. The user has access to the Quizlet website. 2. The user is logged in to their Quizlet account. 3. The user has created a flashcard set. 4. The user has at least one class.	1. Create a new flashcard set. 2. Wait for the "Start teaching this material" pop-up to appear. 3. Select a class from the drop-down menu. 4. Click the "Save" button. 5. Open the selected class. 6. Check whether the newly created flashcard set appears in the class.	The newly created flashcard set is successfully added to the selected class and displayed in its materials.	The pop-up closes after clicking the "Save" button, but the flashcard set is not added to the selected class. The issue occurs regardless of which class is selected. The flashcard set can be successfully added manually using the three-dot menu next to its	Major	New	Medium		
7	Quizlet_002	https://quizlet.com/class/29816932/materials	Ukrainian translations are not suggested for the first flashcard when creating a new set.	**Platform**: Quizlet Web Application **Browser**: Safari **Operating System:** macOS **Language**: English	1. The user has access to the Quizlet website. 2. The user is logged in to their Quizlet account. 3. The user has opened the flashcard creation page. 4. The user has selected English as the left-side term language. 5. The user has selected Ukrainian as the right-side definition language.	1. Open Quizlet. 2. Click the option to create a new flashcard set. 3. Select English as the language for the left-side terms. 4. Select Ukrainian as the language for the right-side definitions. 5. Enter an English word in the first term field. 6. Check the suggested translations in the drop-down menu. 7. Enter another English word in the second term field. 8. Check the suggested translations in the drop-down menu.	Quizlet should automatically suggest Ukrainian translations for English terms in the drop-down menu, including the first flashcard.	When entering an English word in the first term field, Quizlet does not suggest its Ukrainian translation. Instead, translations in other languages are displayed, but Ukrainian is missing. Starting from the second flashcard, Ukrainian translations are suggested correctly in the drop-down menu. The issue occurs consistently when creating new flashcard sets. The user can still enter Ukrainian translations manually.	Minor	New	Low		
7	Quizlet_002	https://quizlet.com/class/29816932/materials	Quizlet: Incorrect translation suggestions persist **after troubleshooting**	**Platform**: Quizlet Web Application **Browser**: Safari **Operating System**: macOS **Language**: English	1. The user has access to the Quizlet website. 2. The user is logged in to their Quizlet account. 3. The user has opened the flashcard creation page. 4. The user has selected English as the left-side term language. 5. The user has selected Ukrainian as the right-side definition language.	1. Open Quizlet. 2. Click the option to create a new flashcard set. 3. Select English as the language for the left-side terms. 4. Select Ukrainian as the language for the right-side definitions. 5. Enter an English word in the first term field. 6. Check the suggested translations in the drop-down menu. 7. Enter another English word in the second term field. 8. Check the suggested translations in the drop-down menu."	Quizlet should automatically suggest Ukrainian translations for English terms in the drop-down menu, including the first flashcard.	Quizlet suggests unrelated English words such as dog, fish, and cow instead of the Ukrainian translation.	Major	Open / Reproduced--> Fixed (Retest Passed)	Medium		The issue persists after following the support team's recommendations. Safari is up to date, and the browser cache has been cleared. However, the incorrect suggestions are still displayed. --> **Issue no longer reproducible. Ukrainian translation suggestions for the first word are displayed correctly.**

8	Quizlet_003	https://quizlet.com/support	The feedback form does not specify supported file formats when an attachment upload fails.	**Platform**: Quizlet Web Application **Browser**: Safari **Operating System:** macOS **Language**: English	1. The user has access to the Quizlet website. 2. The user is logged in to their Quizlet account. 3. The user has opened the feedback form. 4. The user has prepared a screenshot to attach to the form.	1. Open the Quizlet feedback form. 2. Fill in the required feedback fields. 3. Click "Upload attachment". 4. Select a screenshot file from the device. 5. Wait for the file to upload. 6. Observe the error message.	The feedback form should either accept the uploaded screenshot or display a clear error message explaining why the file cannot be uploaded. If the file format is not supported, the form should specify the supported file formats and provide clear instructions to the user.	The attachment upload fails, and the form displays the following messages: "Attachment couldn't be uploaded." "There is an error in your attachment." However, the form does not specify which file formats are supported or explain the exact reason for the upload failure. As a result, the user cannot determine what needs to be changed to upload the attachment	Minor	New	Low		
	Zvychaina	e-commerce											
9	zvychaina_001	https://zvychaina.com/	Poor text readability on the order confirmation page	iPhone, Safari, mobile version	An order has been successfully placed.	1. Open the website on a mobile device. 2. Add a product to the cart. 3. Complete checkout. 4. Place the order. 5. Observe the confirmation page.	Some text elements have insufficient contrast against the background and are difficult to read. The font size of some text elements is too small.	All text elements should have sufficient contrast and an appropriate font size to ensure readability.	Minor	New	Medium
