Both products remained in the shopping cart, and the total amount remained unchanged at 700 UAH.
TC_025	https://www.yakaboo.ua/ua/prirodnicha-istorija-drakoniv.html	Verify that a user can view delivery information	Delivery information display	Decision Table Testing	The Yakaboo website is open in Safari on macOS. The user is not logged in. A book's product details page is open. The delivery options are displayed.	1. Open the checkout page. 2. Locate the "Delivery" section. 3. Click "Choose" to select a delivery city. 4. Select "Lviv" from the list of available cities. 5. Click "Apply". 6. Verify that the available delivery methods are displayed. 7. Check the delivery prices and estimated delivery times. 8. Select "Meest ПОШТА". 9. Verify that the selected delivery method is highlighted. 10. Check that the required branch address field is displayed. 11. Open the branch address dropdown. 12. Verify that a list of available branches is displayed. 13. Check that the delivery cost is added to the order total. 14. Select other available delivery methods and verify that their corresponding information is displayed. 15. Check that the delivery price and order total are updated according to the selected delivery method.	Selected book: "Природнича історія драконів" Product price: 400 UAH Delivery city: Lviv Available delivery methods: - Nova Poshta parcel locker - Nova Poshta branch - Meest branch - Nova Poshta courier - Ukrposhta branch - Ukrposhta courier Selected delivery method: Meest ПОШТА Delivery price: 55 UAH Estimated delivery time: 1–3 days Expected order total: 455 UAH	The system displays the available delivery methods, their prices and estimated delivery times after the delivery city is selected. The selected delivery method is highlighted, and the corresponding required address field is displayed. The user can view the available branches in the address dropdown. The delivery cost is correctly added to the order total, which is updated according to the selected delivery method.	After selecting Lviv as the delivery city, the system displayed six available delivery methods with their prices and estimated delivery times. Selecting a delivery method highlighted the option and displayed the corresponding required address field. The Meest branch address dropdown displayed a list of available branches. The delivery cost of 55 UAH was added to the order total, which changed from 400 UAH to 455 UAH. Other delivery methods also displayed their corresponding information and prices correctly.
TC_026	https://www.yakaboo.ua/ua/prirodnicha-istorija-drakoniv.html	Verify that a user can switch between domestic and international delivery	Delivery destination selection	State Transition Testing	1. The Yakaboo website is open in Safari on macOS. 2. The user is not logged in. 3. A book has been added to the shopping cart. 4. The checkout page is open.	1. Open the checkout page. 2. Locate the "Delivery" section. 3. Select the "Закордон" tab. 4. Observe the displayed delivery options. 5. Check whether the delivery city and available delivery methods are updated. 6. Switch back to the "По Україні" tab. 7. Verify that the domestic delivery options are displayed again.	Delivery destinations: - Ukraine - Abroad Delivery destination: Poland City: Warsaw Delivery method: NovaPost courier Estimated delivery time: From 5 days Delivery cost: 745 UAH Product price: 400 UAH Expected order total: 1,145 UAH	The user can switch between domestic and international delivery options. The system displays the delivery information relevant to the selected destination.	The user can switch to international delivery and select a country and city. After selecting Poland and Warsaw, the system displayed the available NovaPost courier delivery option, estimated delivery time and price. Required address fields were displayed. The delivery cost of 745 UAH was added to the order total, which changed from 400 UAH to 1,145 UAH. Additional information about customs duties and VAT was displayed. After switching back to domestic delivery, the available Ukrainian delivery options were displayed correctly.
TC_027	https://www.yakaboo.ua/ua/prirodnicha-istorija-drakoniv.html	Verify that required contact fields are validated	Contact information validation	Equivalence Partitioning	1. The Yakaboo website is open in Safari on macOS. 2. The user is not logged in. 3. A book has been added to the shopping cart. 4. The checkout page is open. 5. The contact information fields are empty.	1. Open the checkout page. 2. Locate the "Your contact details" section. 3. Leave all required fields empty. 4. Click the "Save" button. 5. Observe the system response. 6. Verify whether validation messages are displayed. 7. Check whether the user can proceed without entering the required information.	First name: Empty Last name: Empty Phone number: Empty Email: Empty	The system validates all required contact fields and displays appropriate validation messages. The user cannot proceed without providing the required information.	After clicking the "Save" button with all contact fields left empty, the system displayed validation messages indicating that each field is required. The required fields were highlighted.

TC_028	https://www.yakaboo.ua/ua/prirodnicha-istorija-drakoniv.html	Verify that the system validates an incorrectly formatted email address	Email address format validation	Equivalence Partitioning	1. The Yakaboo website is open in Safari on macOS. 2. The user is not logged in. 3. A book has been added to the shopping cart. 4. The checkout page is open.	1. Open the checkout page. 2. Locate the "Your contact details" section. 3. Enter an invalid email address without the required email format (e.g. "natalie123"). 4. Click the "Save" button. 5. Observe the validation message displayed below the email field. 6. Replace the email address with an input containing Cyrillic characters (e.g. "наталі123"). 7. Click the "Save" button again. 8. Verify that the system displays an email validation message.	Invalid email addresses: - natalie123 - наталі123	The system rejects incorrectly formatted email addresses and displays an appropriate validation message. The user cannot save the contact information with an invalid email address.	The system rejected both incorrectly formatted email addresses and displayed the validation message: "Будь ласка, введіть правильну email адресу." The system displays an email validation message for an incorrectly formatted email address, even when the other required contact fields are completed.
TC_029	https://www.yakaboo.ua/ua/prirodnicha-istorija-drakoniv.html	Verify switching between recipient options in the checkout form	Switching between recipient options during checkout	State Transition Testing	1. The Yakaboo website is open. 2. The user is not logged in. 3. At least one product has been added to the shopping cart. 4. The user has proceeded to the checkout page.	1. Open the checkout page. 2. Locate the "Your contact details" section. 3. Select "I am the recipient". 4. Enter customer details in the required fields. 5. Select "Another person is the recipient". 6. Verify that a separate "Customer Details" section is displayed. 7. Verify that a separate "Recipient Details" section is displayed. 8. Enter recipient details in the corresponding fields. 9. Click the "Save" button. 10. Verify that the customer and recipient details are saved separately.	Customer: Name: Test Surname: User Phone: Test phone number Email: Valid email address Recipient: Name: Test Surname: User Phone: Test phone number	The system allows the user to enter customer and recipient details separately. The recipient details are saved independently of the customer details.	The system displays separate fields for the customer and recipient. The recipient's details can be entered and saved independently of the customer's details.
TC_030	https://www.yakaboo.ua/ua/prirodnicha-istorija-drakoniv.html	Verify delivery cost calculation and free delivery eligibility	Verification of delivery cost calculation based on the order amount and selected delivery method	Boundary Value Analysis	The Yakaboo website is open in Safari on macOS. The user is not logged in. The user has added a book to the shopping cart. The user is on the checkout page.	1. Open the shopping cart. 2. Set the product quantity to 2. 3. Verify that the cart total is 800 UAH. 4. Verify the amount required to qualify for free delivery. 5. Increase the product quantity to 3. 6. Verify that the cart total changes to 1,200 UAH. 7. Click "Proceed to checkout". 8. Select delivery within Ukraine. 9. Verify the displayed delivery costs for all available delivery methods. 10. Verify that parcel lockers and branches offer free delivery. 11. Verify that courier delivery options remain paid. 12. Switch to international delivery. 13. Verify that the international delivery information and customs/VAT warnings are displayed. 14. Switch back to domestic delivery. 15. Verify that the domestic delivery options are displayed correctly.	Product: Природнича історія драконів Unit price: 400 UAH Quantity 2: Cart total: 800 UAH Remaining amount for free delivery: 99 UAH Quantity 3: Cart total: 1,200 UAH Domestic delivery: Nova Poshta courier: 135 UAH Ukrposhta courier: 75 UAH Other displayed delivery options: Free	The system correctly calculates the amount required to qualify for free delivery. After the order amount reaches the free delivery threshold, eligible domestic delivery methods are displayed as free of charge. Courier delivery options remain paid. When international delivery is selected, the system displays the relevant delivery information and customs/VAT warnings.	With a cart total of 800 UAH, the system correctly displayed that an additional 99 UAH was required to qualify for free delivery. After increasing the quantity to 3, the cart total changed to 1,200 UAH. The system displayed free delivery for Nova Poshta parcel lockers, Nova Poshta branches, Meest and Ukrposhta branches. Courier delivery remained paid: 135 UAH for Nova Poshta and 75 UAH for Ukrposhta. When international delivery was selected, the system displayed the relevant customs and VAT warnings. Switching back to domestic delivery restored the available Ukrainian delivery options.
TC_031	https://www.yakaboo.ua/ua/prirodnicha-istorija-drakoniv.html	Verify gift certificate validation during checkout	Verification of gift certificate validation when applying a gift certificate during checkout.	Error Guessing	The Yakaboo website is open in Safari on macOS. The user is not logged in. The user has added a book to the shopping cart. The user is on the checkout page. The Gift Certificate section is available.	"1. Open the checkout page. 2. Locate the Gift Certificate section. 3. Select ""I have a gift certificate"". 4. Leave the gift certificate field empty and verify that the Apply button is disabled. 5. Enter an invalid gift certificate code. 6. Click ""Apply"". 7. Verify that an appropriate validation message is displayed. 8. Verify that the entered code remains in the field. 9. Verify that the order total is not changed."	Gift certificate code: TEST123456	The system should disable the Apply button when the gift certificate field is empty. When an invalid gift certificate code is entered and the Apply button is clicked, the system should display an appropriate validation message indicating that the certificate is invalid. The entered code should remain in the field, and the order total should remain unchanged.	The Apply button was disabled when the gift certificate field was empty. After entering the invalid code TEST123456 and clicking "Apply", the system displayed the message: "Подарунковий сертифікат недійсний. Перевірте код і спробуйте ще раз." The entered code remained in the field.
TC_032	https://www.yakaboo.ua/ua/prirodnicha-istorija-drakoniv.html	Verify that a user can enter a comment for an order	Verification of order comment input during checkout.	N/A	The Yakaboo website is open in Safari on macOS. The user is not logged in. The user has added a book to the shopping cart. The user is on the checkout page. The Comment section is available.	1. Locate the Comment section on the checkout page. 2. Click the comment input field. 3. Enter a comment: "Please call me after 6 PM. I will be available to receive the order." 4. Click outside the input field. 5. Verify that the entered comment remains in the field.	Comment: Please call me after 6 PM. I will be available to receive the order.	The system should allow the user to enter a comment in the designated field. The entered comment should remain visible after the field loses focus.	The comment was successfully entered into the input field. After clicking outside the field, the entered text remained visible.
TC_033	https://www.yakaboo.ua/ua/prirodnicha-istorija-drakoniv.html	Verify that the user can change the selected payment method during checkout	Verification of payment method selection and switching during checkout.	State Transition Testing	The Yakaboo website is open in Safari on macOS. The user is not logged in. The user has added a book to the shopping cart. The user is on the checkout page. The Payment section is available.	1. Locate the Payment section. 2. Verify the default selected payment method. 3. Select "Оплата при отриманні". 4. Verify that the selected payment method changes. 5. Select "Покупка Частинами від Monobank". 6. Verify that the related payment options and required phone number field are displayed. 7. Select "Оплата карткою онлайн (через сервіс LiqPay)". 8. Verify that the Monobank-specific fields are no longer displayed. 9. Select "Оплата карткою Національний кешбек (єПідтримка)". 10. Verify that the selected payment method and related interface elements are updated accordingly.	Payment methods: - Online card payment (LiqPay) - Payment upon receipt - National Cashback card payment (єПідтримка)	The system should allow the user to switch between available payment methods. The selected payment method should be visually highlighted. The payment section should dynamically display the relevant fields and options for the selected payment method. Fields and options related to the previously selected payment method should no longer be displayed when switching to another method.	All tested payment methods were successfully selected. The selected payment method was highlighted correctly. When Monobank Installments was selected, the system displayed the installment option (3 payments, 400 UAH per month) and a required phone number field. When switching to other payment methods, the related interface elements were updated accordingly. The fields specific to the previously selected method were no longer displayed.
